

Bio 135 lab Vessels.

Purpose.

1. To introduce students to the major vessels.
2. Give students an understanding of the extent of the cardiovascular system

Activities:

Either students will do a guided exercise using the Maniken to build the arteries (red clay) and veins (blue clay) of the vessels listed below. Alternatively students may be asked to use the virtual lab and study models and learn these major vessels.

Brachiocephalic

Left and right common carotids

Left and right Subclavian Subclavian

Axillary

Brachial

Cubital

Radial

Ulnar

Abdominal Aorta

Thoracic Aorta

Internal iliac

External iliac

Femoral

Common iliac artery

Great saphenous

The external carotids

External Jugular

Facial

Brachiocephalic

Subclavian

Axillary

Cephalic

Brachial

Inferior Vena Cava (abdominal)

Common iliac

External iliac
