

Epithelial Tissues
Fill in the following table.

Tissue	Cell Shape ¹	Layers ²	Special Features ³	Functions	Locations ⁴
Simple Squamous					
Stratified Squamous					
Simple Cuboidal					
Stratified Cuboidal <i>(Not in lab!)</i>					
Simple Columnar					
Pseudostratified Columnar					
Stratified Columnar <i>(Not in lab!)</i>					
Transitional					

¹ Flattened, cube-shaped, or column-shaped

² One or multiple

³ Special features include any additional identifiable structures except nuclei (which you should be able to identify for all tissues). These may include cilia, microvilli, and goblet cells.

⁴ For lab, only need locations of the specific tissues on the slides, not all possible locations.
